Product Name:
Specialty Bakery Packaging

Product Description:

PPI-200 Interleaver Stacker

Your solution for SPECIALTY BAKERY PACKAGING

The PPI-200 accurately and consistently places a pre-programmed sheet of film, foil or paper under bakery portions at speeds up to 1100 dozen per hour per lane.

Once the interleaving sheet has been placed under the portion, it may be folded or wrapped around the product for ease of separation, sanitary handling, and - with foil sheets - box to oven baking.

Stacking modules automatically count and stack the interleaved portions into uniform groups. The uniform stacked groups are then conveyed to your wrapping or cartoning machines or can be easily packed off by hand.

Manufactured with stainless steel construction to meet the industry's latest sanitation standards, the PPI-200 blends state-of-the-art PLC control with a durable design that ensures long machine life and low maintenance.
